The Explanation of the Almanack.

I. *The Sixth Column on the Right-hand Page, shews every Day in the Year, how many Minutes and Seconds a Pendulum Clock or Watch goes too fast or too slow.* (*Example*) *On the* 10*th of* March, *the Pendulum will go* 7′ 28″ *too fast; on the* 10*th of* May 4′ 5″ *too slow. But then the Clock must be set exactly to the true Time, on the* 4*th of* April, *or* 6*th of* June, *or* 21*th of* August, *or* 13*th of* December, *because on those Days the* Equation *is just nothing.*

II. *Under Sun Rising and Setting, the Minutes are in the middle.* (*Example*) *On the* 10*th of* January *you find* 7-49-5, *which shews the Sun Rises* 49 *Min. past* 7 *Morn, and Sets* 49 *Minutes before* 5 *at Night.*

III. *The Column for length of Days and Nights, against the* 6*th of* March, *you find* 11 36 13 *which shews the Day is* 11 *Hours,* 36 *Minutes long, and the Night* 13 *Hours wanting* 36 *Minutes.*

IV. *To find the Hour of the Night by the shadow of the Moon on a Sun-dial, add the Hours and Minutes of the Moon's Southing, to the time of the shadow on the Dial, the Sum (abating* 12 *Hours where it may be) is the true time of the Night.*

Physical Recipe's.

For an inveterate Bloody-flux, or other Fluxes of the Belly.

Take Mutton-broth half a Pint, or better, good Brandy or Sugar Spirits as much, mix them, and exhibit it Blood-warm: It will cure to a Wonder.

For the Headach.

Take Powers of Amber and Rosemary, of each an Ounce, Spiritus Cosmeticus half an Ounce, mix them; often smell to it, and rubbing it in the Palm of your Hand, snuff it as it were up the Nostrils; it cures it presently. If it is vehement, bathe the Head with it also.

Of the Eclipses this Year 1705.

WIthin the Compass of this Year will happen only Two Eclipses, and these both of the Sun.

The first of which will happen in *May*, on the 11th Day; it begins about Sun-setting, and therefore will be invisible to us; but to the more Southern Parts it will appear a great Eclipse, &c.

The second happens on *November* the 5th Day, about 2 of the Clock in the Afternoon; this also will be invisible as to us, but may, if the Air be clear, be seen by those inhabiting the further Parts of *France* and *Spain*, and other Countries tending Southward: And thus much concerning the Eclipses this Year

On the 9th Day of *January*, this present Year, happens a Conjunction of *Saturn* and *Mars*, in the very latter end of *Aries*, and another of *Jupiter* and *Mars*, the 9th Day of *April* following, in 23 Degrees of *Gemini*; also on *November* the 16th happens an Opposition of *Saturn* and *Mars*, from *Taurus* and *Scorpio*; all which will have their Effects, which I leave time to reveal.

*** Here note, That the Dominical Letter is considered with the Golden Number in this IX Table, exactly as it is in Tab. VIII. aforegoing, though the breadth of the Page would not admit it to be inserted: And this you are always to take Notice of.

Hiero

Hieroglyphicks of the Future State of England, *for* 100 *Years, beginning* An. 1650. *and ending* An. 1750.

THese *Hieroglyphicks* I copied out of a Large Folio Book about Thirty Years since. 'Twas done without doubt by a very Learned hand, and near as big as a Large Church Bible, containing the Future State of *England*, for several hundreds of Years to come, curiously done in large Figures and admirably painted, beginning from 1650 and ending *Anno* 2150. The Centuries were all distinct and exactly placed; but whether the Figures in each Century were placed in their due Order, I know not; I only copied out in Words the Hieroglyphicks of the first Hundred Years, which possibly may be acceptable to the Curious. I have parted with many Copies of them to several, desirous of things of this kind, many Years since, which then were not much valued, because their Signification was difficult to be understood; which since the late Revolution, seems to be clear, To avoid the trouble of many Transcripions, I have here Printed them.

1. An Executioner with a bloody Sword, on which was written these words [*Ireland*, *Ireland*] Other Executioners cutting down Oak Trees.

2. A Head and Shoulders with a Crown over it, but not touching it.

3. An Assembly of Men in a Convocation-House, all in a melancholy posture, leaning upon their hands and elbows.

4. A great and famous Wood or Forest, with multitudes of Hewers about it cutting of it down.

5. Fortune cloathed in a golden Mantle, having in her right hand a golden Scepter crowned, and in her left hand a Sword, on the Blade of which was written *P A X*.

6. A Man lying along dead, as in State, and upon him a Scepter and Sword with Three Crowns.

7. A Dragon crowned, and holding a Scepter in his right Claw.

8. A great red crowned Dragon with multitudes of little Dragons, striving to uphold a triple Crown and Crosiers Staff.

9. Death shooting his arrows at Mankind, many dead upon the Ground, some wound in sheets, some laid in coffins, other digging graves for the dead.

10. A green Sea, in some places red as with Blood: Three squadrons of Ships one against another, with fire and smoak.

11. Another green Sea, in many Places bloody; two great Squadrons of Ships, with fire and smoak.

12. A large Field of Wheat or Grain full of Reapers, with many Labourers, Carts and Teams, carrying in the Grain.

13. The great red Dragon with one of his Wings cut off, the Triple Crown cast on the ground, the Bishop of *Rome* falling backwards.

14. A great City in flames, which seems as if it was divided into two Cities, the one of which only is burnt.

15. Great Artillery in large numbers planted against a City having no Walls, but a River running through it.

16. A

16. A Man carrying a dark-lanthorn in his hand, out of his mouth come these words, [*NOW OR NEVER.*]

17. The Twins bound hand and foot, and chained about the middle to a Post.

18. A mighty great crowned Dragon with Rams Horns fighting with a Ram, a great Mole assisting the Dragons; many little Moles biting the Ram by the heels.

19. A Dragon to whom a Man offers a Cup of Liquor, on the Cup was written *MORS*.

20. A famous River full of Ships, with multitudes of men going to and fro in it upon the Rivers side, a great City; on the opposite side, *A Village in Flames.*

21. A Dragon crowned, upon his breast this word *VIRGO*; many lie slain at his feet.

22. The Dragon wounded, then dead.

23. The funeral of the Dragon.

24. Another Dragon crowned, and holding a Scepter in his Claws.

25. A Mitre chained to a Post, a Scepter held by a Dog; a *Turk* kicking at a Royal Diadem.
